

Year 2

Autumn Term 1

As readers, using the traditional fairy tales of Cinderella, we will practise our reader voices - working on our expression. We will read many texts and books that will inspire our writing.

As writers we are going to continue our exploration of using Opening Doors, and using pictures as a base from which to write some amazing poetry and stories. We will also learn about adverbs and how they can be used in different ways for effect.

As mathematicians we are going to be focussing on place value using the strategy of using concrete resources, pictures and then moving to the abstract - thinking about problem solving.

As scientists we will be carrying out investigations with different everyday materials, exploring why some materials are better suited for different objects than others.

As historians we will be researching Walt Disney, learning about his life and achievements.

As artists we will be practising our sketching skills.

As Geographers we will be learning all about the weather and becoming weather reporters!

As religious educators we will be learning about Hinduism.

As always we will be continuing to develop our personal, emotional and social skills through working in pairs, groups, activities and circle time.
